

Settings for your emails with Hulme Tech when using Outlook or Other

Username: *Use the email.*

Password: *Use the email account's password.*

Incoming Server:	mx1.hulme.tech <ul style="list-style-type: none">• IMAP Port: 993• POP3 Port: 995
---------------------	--

Outgoing Server:	mx1.hulme.tech <ul style="list-style-type: none">• SMTP Port: 465
---------------------	---

IMAP and SMTP require authentication. Enable SSL/TLS

The difference between POP3 and IMAP

POP3 downloads the email from a server to a single computer, and then deletes the email from the server; this won't sync anything like reading messages between devices. On the other hand,

IMAP stores the message on a server and synchronises the message across multiple devices. This stores all emails on the server for peace of mind that if the PC breaks you still have your emails, however, your hosting package and cost of hosting will vary depending on the hard drive space your emails use on the server.

Access Emails Though Webmail

Navigate to: <https://mx1.hulme.tech/webmail>

Login with your email/password

Select RoundCube and continue to your emails.
